We Are A Global Brand in Airport Operations & Construction

We aim to deliver world-class airport services with the mission of creating the highest value for all stakeholders in airport operations through our customer oriented management approach.

TAV was established as a joint venture to bid for the building and operating rights of Istanbul Ataturk Airport's International terminal in 1997. After winning the tender, TAV emerged as a global brand and Istanbul Ataturk Airport evolved into a major hub.

Through our unique group structure and extensive know-how, we are capable of adding value to each phase of airport development and operations, including design and construction. Plus, we provide full range of airport services through our subsidiary service companies.

Today, we serve 152 million annual passengers at 15 airports we operate in 7 countries and 3 continents. In addition, through our service companies, we provide a range of airport services at 76 airports in 21 countries.

We Add Value

We are specialists in concession and BOT projects

TAV developed, took over the management of and operated airports that had long been managed by state authorities with poor commercial and operational focus and that were severely deprived of capital investments for capacity and passenger experience enhancements. Thus, we have gained a great deal of expertise in change management. We work hand in hand with governments and authorities in all our projects and enjoy a great operational efficiency due to being able to integrate all necessary services to develop a project, within a single managing body.

WE DESIGN

Our internal design team is experienced on designing the most efficient airport buildings.

WE FINANCE

Our financing teams are highly specialized with several years of experience in the project finance area and has finalized many major airport project finance transactions. We work with a pool of over 30 worldwide known international lenders, 8 Development Financial Institutions in the basis of structured/project financing and have wide across short to long term credit lines in almost all Turkish banks.

WE BUILD

As an affiliated company of TAV Airports, TAV Construction is the world's largest airport contractor company according to Engineering News Record (ENR).

WE OPERATE

We have an extensive know-how on integrating the complex airport operations under a common management through our wholly owned subsidiary service companies.

WE PROMOTE

We carry out effective route development activities to attract new airlines, additional routes and frequencies to the airports we operate. Our airport portfolio is represented in world-wide aviation events.

WE ARE COMMITTED

We are long term investors with a strong commitment to our assets and customers.

GROUP

BTA

Food & Beverage Services

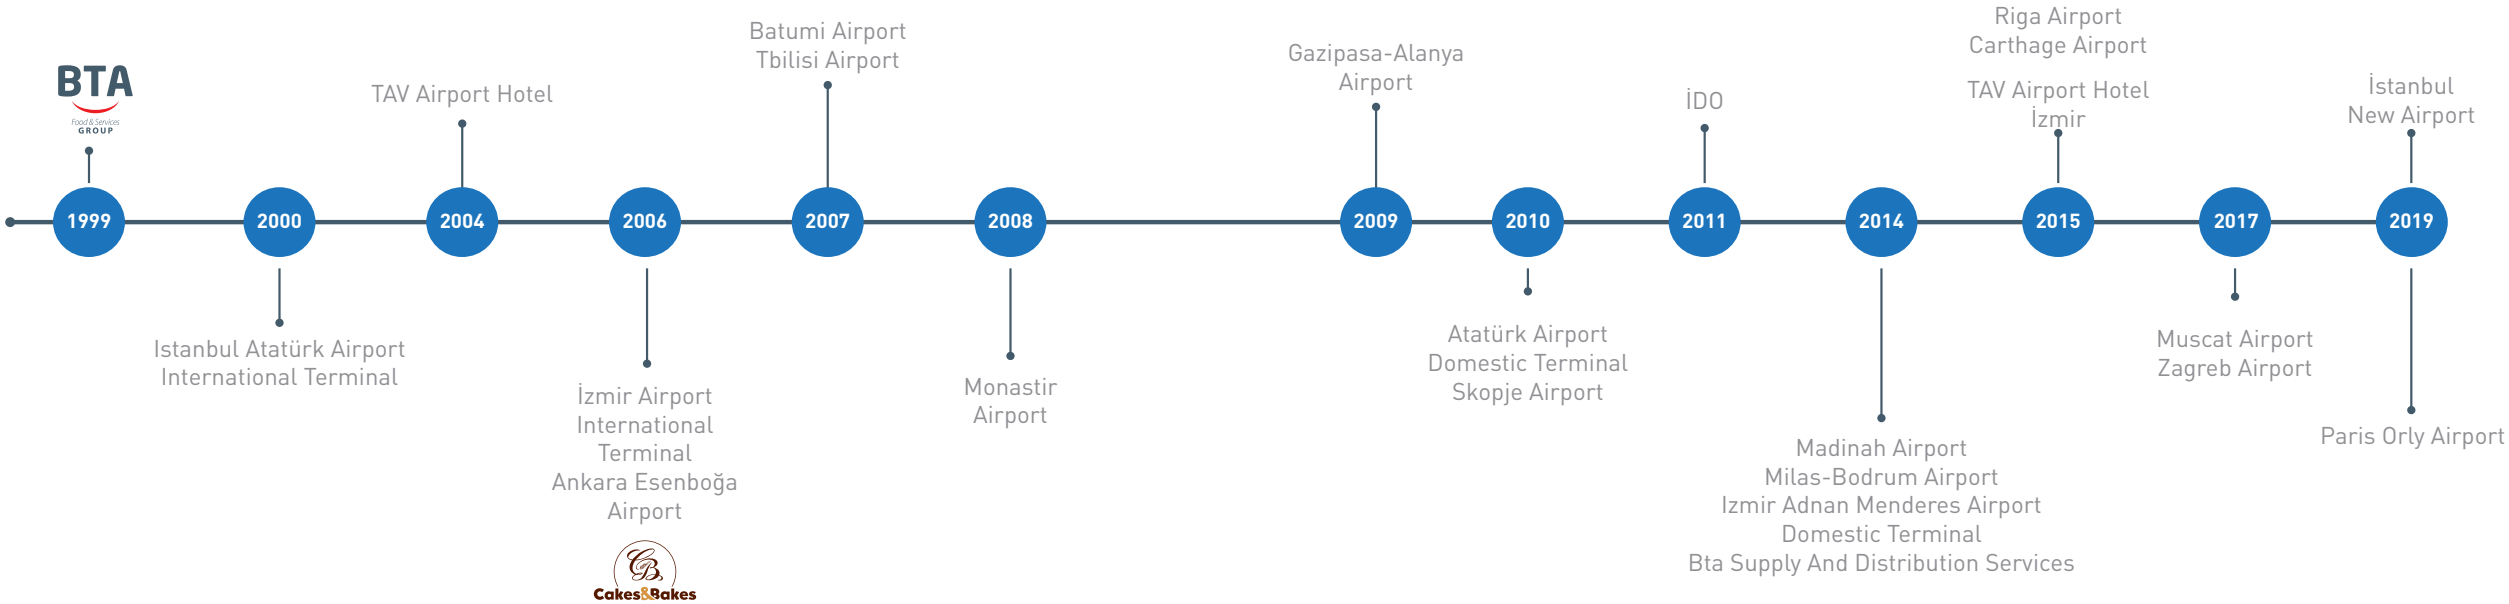

BTA was founded in 1999 and established its first F&B units in Istanbul Atatürk Airport’s new International Terminal in January 2000. Today, the company operates more than 350 F&B units in 60,000 m² area and significantly expanded its business scope by offering services at airports, sea lines, and urban spots.

In 2011, BTA took over the F&B units of IDO, Istanbul’s fast ferry and sea bus company operating within Istanbul and also to/from neighboring cities around Marmara Sea. 26 ferries’, 25 sea buses’ and 13 terminals’ F&B services are provided by BTA.

The airport hotels in Istanbul Atatürk Airport and Izmir Adnan Menderes Airport, which have 128 and 81 rooms respectively, are also operated by BTA. BTA is also present in Istanbul’s new airport, operating F&B units.

With over 85 years of experience, Havaş provides ground handling services to the best extent and adds value to its stakeholders with a secure, high quality and innovative service concept. Havaş serves over 1 million flights per annum of over 200 globally known airlines. Havaş is always passionate about offering a high quality service with the help of its rich human resources, strong equipment fleet and state of the art technological infrastructure.

Havaş experienced a rapid growth following the acquisition of its shares by TAV Airports and has been looking for growth opportunities at the international markets since then. In 2010, Havaş established Turkish Ground Services (TGS), which is one of the three ground handling service companies in Turkey, with a 50/50 partnership with Turkish Airlines. Soon after, Havaş started to provide services in Latvia in 2011 and has expanded its network in Europe. In addition to these successful initiatives, in 2014, Havaş began to provide service in Saudi Arabia, being the first independent ground handling company of the Kingdom.

Havaş is a wholly owned subsidiary of TAV Airports Holding.

The Future is under our Wings

TAV Technologies, a subsidiary of TAV Airports Holding and a leading technology brand delivering software and hardware products; designs, develops and implements local and global airport services and solutions in the aviation industry. TAV Technologies integrates separate systems and provides support with the use of new generation technologies, offering airport-friendly products through the extensive solutions it develops and turnkey projects it undertakes. The company covers all 3 main streams of information technologies in one company; Operation and Maintenance Service Provider, Contractor for Projects and Software Vendor. TAV Technologies currently provides services to 36 airports and 21 companies in 9 countries.

Offering services with an elite team specializing in aviation sector technological solutions, TAV Technologies provides sustainable management of complex airport operations and designs new products through the utilization of its extensive know-how. The products developed by TAV Technologies include AODB, IB, FIDS, RMS, CDM, SLOT, PIS, IATA Type-B Message Parser, TAV Mobile, VIP/ CIP Operation and Reservation Suite, MIS, IMS, SHRIKE, SmartZone. TAV Information Technologies also provides services in areas such as Data Collection, UNIX and Database Consultancy Services, System and Infrastructure Services, Consultancy on Information Technology and Aviation Systems as well as Enterprise Resource Planning.

Turnkey solutions developed by TAV Technologies are utilized in many airports in Turkey including Istanbul Atatürk, Ankara Esenboğa, Izmir Adnan Menderes. Apart from Turkish airports, TAV Technologies provide services in a number of airports abroad, such as; Skopje and Ohrid airports in Macedonia; Tbilisi and Batumi airports in Georgia; Monastir and Enfidha-Hammamet airports in Tunisia; Riyadh, Dammam and Madinah airports in Saudi Arabia. The company is strengthening its presence in global market by taking part in projects such as Abu Dhabi Midfield Terminal Building in Abu Dhabi, West Java Airport in Indonesia, Queen Alia Airport in Jordan and the Jeddah Airport Hangar Project in Saudi Arabia. TAV Technologies has been accredited by the ISO 9001 Quality Management System and ISO 27001 Information Security Management System certificates.

| #1 | Airport Contractor 2014-2015-2016-2018 | 26,500 | Total Employees |
| \$21.6 | Billion Contract Value | 1,350 | Architects and Engineers |

We Build Airports for Cities and Cities for Airports

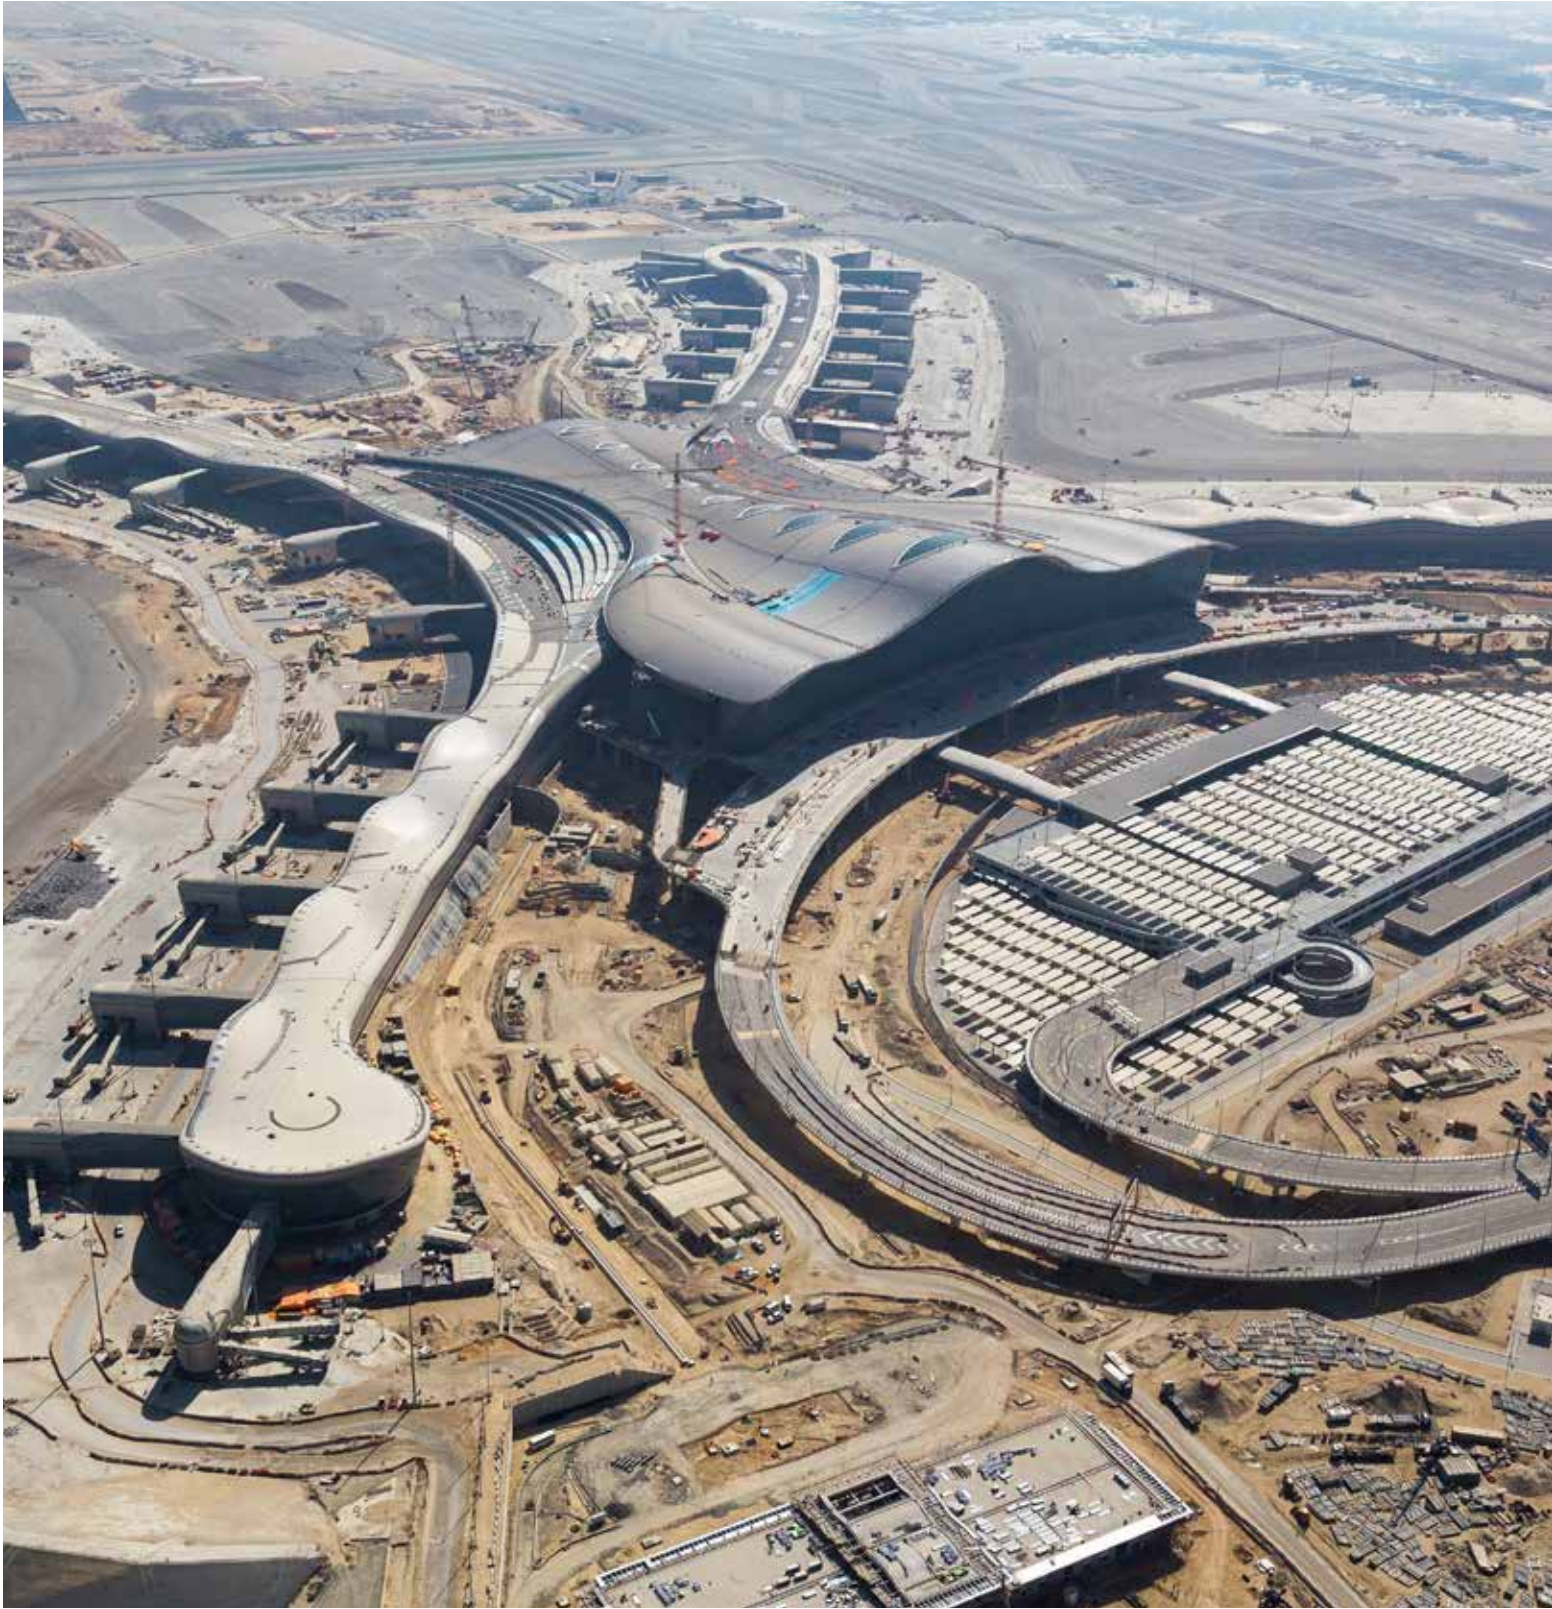

We are a leading contracting firm specialized in construction of airports, airport related facilities and iconic buildings that require high degree of engineering. We achieved to undertake an extensive list of projects worth more than 21.6 billion US Dollars, rapidly becoming the undisputed leader in the region. Our performance has regularly been recognized by the industry’s most reputable publication Engineering News Record (ENR), where in 2014, 2015, 2016 and 2018 we are ranked number one for airport construction.

Some of the noteworthy airport projects we are involved in include İstanbul Atatürk, İzmir Adnan Menderes and Ankara Esenboğa International Airports in Turkey, Cairo International Airport Terminal Building 3 in Egypt, Enfidha-Hammamet International Airport in Tunisia, Madinah Prince Mohammad Bin Abdulaziz International Airport and Terminal 5 of Riyadh King Khaled International Airport in Saudi Arabia, Airside and Landside Infrastructure Works package of the Muscat International Airport in Oman and the Passenger Terminal Complex of Qatar’s state-of-the-art Hamad International Airport. We are currently engaged in one of the largest terminal projects of the region; Abu Dhabi International Airport’s Midfield Terminal Complex which is the largest construction project ever awarded in the United Arab

Emirates. Plus, together with the Main Works package of the Bahrain International Airport Modernization Program, we have consistently become the preferred contractor for 5 of the 6 capitals of the GCC Region. Lastly, we have been awarded construction of the New Pier A at the Amsterdam Airport Schiphol, in the Netherlands.

Having established a strong base for airports in the region, we have also successfully managed to spread our activities to other areas of construction and got involved in other building projects, mainly super-tall towers and iconic buildings. The 425 meters tall Marina-101 Hotel and Residences, the Address Residences Dubai Opera and Il Primo, the luxury residential developments located in the heart of Downtown Dubai adjacent to the World’s tallest building, Burj Khalifa and the Opera House, the Damac Towers by Paramount in Dubai, the Emaar Square project, one of the largest mixed-use real estate developments in İstanbul; and the landmark Headquarters project for the Aéroports de Paris Group at Charles de Gaulle Airport in Paris are some of our projects within the non-aviation sector.

İstanbul acts as our global headquarters supported with 10 branches; namely in United Arab Emirates (Abu Dhabi, Dubai), Qatar (Doha), Egypt (Cairo), Libya, Saudi Arabia (Jeddah), Bahrain, Georgia (Tbilisi), France (Paris) and Netherlands (Amsterdam).

Abu Dhabi International Airport Midfield Terminal Building, Abu Dhabi / UAE

Abu Dhabi International Airport Midfield Terminal Building is the biggest on-going airport project of TAV Construction. The terminal building will cover an area in excess of 700,000 square meters and upon completion, is set to be one of the most spectacular buildings of its generation.

Hamad International Airport Passenger Terminal Complex, Doha / Qatar

Passenger Terminal Complex of the Hamad International Airport is the biggest construction contract that TAV Construction has been awarded and completed thus far with a total built-up area up to 550,000 square meters.

Prince Mohammad Bin Abdulaziz International Airport, Madinah / Saudi Arabia

Prince Mohammad Bin Abdulaziz International Airport is the first airport privatization in Saudi Arabia, is the pioneering public-private enterprise collaboration in the Gulf Region in the aviation industry.

Bahrain International Airport New Passenger Terminal Building, Muharraq / Bahrain

Bahrain International Airport's New Terminal Building is the largest project won ever by a Turkish contractor in Bahrain. The project is the main component of the Airport Modernization Program designed to elevate the service level and upgrade technological infrastructure at the airport.

Adnan Menderes International Airport, Izmir / Turkey

Adnan Menderes Airport's New Domestic Terminal has been awarded the distinguished LEED® Silver certification by U.S. Green Buildings Council® (USGBC) in 2015 and achieved to become the first LEED certified Terminal Building in Turkey.
